The score beside Saint Gregory School is the grade equivalent achieved by that class, which means that while the average for grade 8 would have been 8.6 or the sixth month of grade 8, our 8th graders scored a 12.9 or what you would expect a 12th grader to do in the 9th month of grade 12. This does not mean that they could do 12th grade work but that they did as well on this test as the average 12th grader would be expected to do in the 9th month of 12th grade on the same test. It doesn't mean they are ready to do 12th grade work.

The bold, underlines scores show where our students scored the same or above the anticipated percentile for that particular class of students.
